

Anton Gnatenko

Date of birth: 18 May 1996 | **Email address:** gnatenko.cmc@gmail.com

EDUCATION AND TRAINING

PhD Program in Computer Science 01.11.2021—10.06.2026

Free University of Bozen-Bolzano, Bolzano, Italy

Research area: logic, automated reasoning, algorithms and complexity

Field of study: Computer Science *Supervisor:* Professor Alessandro Artale

Address: Piazza Domenicani 3, 39100, Bolzano, Italy *Website:* www.unibz.it

MSc in Applied Mathematics and Computer Science 01.09.2019—31.08.2021

HSE University, Moscow, Russia

Supervisor: Professor Vladimir Zakharov

Thesis: Modeling, specification and verification of reactive information processing systems.

BSc in Applied Mathematics and Computer Science 01.09.2014—31.08.2019

Lomonosov Moscow State University, Moscow, Russia

Supervisor: Professor Vladimir Zakharov

Thesis: Verification of finite-state transducers using temporal logics.

Secondary school 01.09.2003—31.05.2014

Public School 138, Moscow, Russia

PROFESSIONAL EXPERIENCE

Research engineer 01.06.2026—ongoing

École Normale Supérieure, Paris, France

University teaching assistant 01.09.2022—31.10.2025

Free University of Bozen-Bolzano, Bolzano, Italy

Researcher 01.11.2019—31.08.2021

HSE University, Moscow, Russia

Lecturer 01.11.2019—31.08.2021

HSE University, Moscow, Russia

Teacher 01.09.2017—31.08.2018

Public School No. 1028, Moscow, Russia

LANGUAGES

Russian Mother tongue

English C1 level

Italian B2 level

JOURNAL PUBLICATIONS

2022 — “Satisfiability and Model Checking for One Parameterised Extension of Linear Temporal Logic”, Automatic Control and Computer Sciences (Springer), vol. 56, pp. 649–660.

2021 — “On the Model Checking Problem for Some Extension of CTL*”, Automatic Control and Computer Sciences (Springer), vol. 55, pp. 776–785.

CONFERENCES AND SEMINARS

2025 — European Conference on Artificial Intelligence 2025 – Bologna, Italy

Talk: “Analysing Temporal Reasoning in Description Logics using Formal Grammars”.

2025 — International Conference on Database Theory 2025 – Barcelona, Spain

Talk: “On Deciding the Data Complexity of Answering Linear Monadic Datalog Queries with LTL Operators”.

2024 — Description Logics 2024 – Bergen, Norway

Talk: “On Deciding the Data Complexity of Answering Linear Monadic Datalog Queries with LTL Operators (Extended Abstract)”.

2023 — Description Logics 2023 – Rhodes, Greece

Talk: “A Decidable Temporal DL-Lite Logic with Undecidable First-Order and Datalog-rewritability of Ontology-Mediated Atomic Queries (Extended Abstract)”.

PROJECTS

Application of Program Schemata Theory and Automata Theory to Verification and Optimisation of Programs, 2017—2020.

Goal: develop model-checking algorithms for sequential reactive programs.
